EDUCATION

Vellore Institute of Technology, Bhopal | Expected May 2026

Bachelor of Technology in Computer Science | CGPA: 8.18/10.0 | Minors in Cyber Security & Digital Forensics .

SKILLS

- **Languages & Frameworks:** Java, C++, Python, JavaScript, React.js, Next.js, Node.js, Express.js.
- **Web Technologies:** HTML, CSS, Tailwind CSS, REST APIs, UI/UX responsive design.
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase.
- **Core CS:** Data Structures & Algorithms, OOP, OS, DBMS, CN.
- **Cloud & DevOps:** Docker, CI/CD, Git/GitHub, Linux.

PROJECTS

InsightDoc: Smart Document Assistant | [Link](#)

Aug 2025 – Oct 2025 | Next.js, Tailwind CSS, Google Generative AI API, Clerk Authentication, Convex, PDF.js.

- Engineered a full-stack web application enabling users to upload PDF documents and ask context-aware, AI-driven questions for intelligent document interaction.
- Integrated Google Generative AI API to deliver precise, contextually relevant answers from uploaded PDFs, simulating a smart virtual assistant experience.
- Implemented Clerk authentication for secure login/signup and leveraged Convex backend to ensure real-time state synchronization across users and sessions.

VisionEdge : AI-Powered Business Insight Dashboard | [Link](#)

June 2025 - July 2025 | Python, OpenCV, Flask, Scikit-learn, Pandas, NumPy, Matplotlib, MySQL/MongoDB.

- Built a full-stack analytics dashboard capable of forecasting sales trends and predicting customer churn to support data-driven strategic decision-making.
- Implemented HSV-based color detection using Python and OpenCV to reliably track visual input, achieving consistent performance even under fluctuating lighting conditions.
- Designed and trained machine learning models to classify high-risk customers, calculate churn probability, and estimate product demand enabling more effective customer segmentation and inventory planning.

Geo-India : Geospatial Guessing Game | [Link](#)

Dec 2024 – Jan 2025 | Firebase, Google Maps SDK, React.js, JavaScript, HTML/CSS, GeoJSON .

- Created an interactive geospatial guessing game for the Space India Hackathon, designed to make location-based learning engaging and intuitive.
- Developed the backend using Firebase to support scalable data storage, real-time updates, and smooth user account management.
- Integrated Google Maps SDK to enable dynamic map interactions, improving navigation and overall gameplay experience through an intuitive interface.

EXPERIENCE

Indian Space Lab : *Research & Simulation Intern*

- Engineered and simulated orbital trajectories for 5+ CanSat prototypes using Python, achieving 93% prediction accuracy and improving mission planning reliability.
- Automated technical documentation workflows using Java and LaTeX, reducing manual effort by 40% and streamlining processes across multiple subsystems.

ACHIEVEMENTS

- Achieved All India Rank 200 in the All India Space Lab Winter Internship Examination 2024–25, ranking among top national performers and representing VIT with a 66.77% campus success rate.
- Secured AIR 1012 in TCS CodeVita Season 12 by solving 5 out of 6 problems in one of the world's most challenging competitive coding hackathons.
